OBJECTIVE

AI & Data Science undergraduate focused on building behavioral analytics and productivity intelligence systems. Interested in adaptive software that detects user cognitive patterns and modifies workflows to improve efficiency and reduce fatigue. Seeking opportunities in applied AI, human-computer interaction, and data-driven system design.

TECHNICAL SKILLS

- Data Analysis & Reporting: Excel, SQL
- Programming & Tools : Python (Pandas, NumPy, Matplotlib, Seaborn), Git & GitHub, Jupyter Notebook, Google Colab
- Business Intelligence & Visualization: Power BI (DAX, Power Query), Tableau, Looker Studio
- Data & Modeling: Exploratory Data Analysis, Data Cleaning, Statistical Analysis, Feature Engineering, Model Evaluation
- AI & Systems : Machine Learning Fundamentals, Generative AI Concepts, Pattern Recognition, Behavioral Analytics

EXPERIENCE

Data Science Intern | Labmentix, Bengaluru (Jan 2026 – Present)

- Performed exploratory analysis and preprocessing on multiple industry datasets including food delivery, retail customer behavior, and tourism analytics
- Built analytical models to identify customer trends, spending patterns, and location-based preferences
- Designed dashboards and visual reports to communicate business insights clearly
- Worked on structured problem statements simulating real business decision scenarios

Data Analyst Intern | Izeon Innovations Pvt. Ltd., Chennai (Jun 2025 – Jul 2025)

- Built interactive Power BI dashboards using real-world streaming datasets
- Designed KPI tracking systems to support performance monitoring
- Analyzed data using Excel and SQL to support reporting and validation.
- Cleaned and transformed data using Excel and Power Query
- Delivered structured insight reports for decision-making support.

PROJECTS

CodeSense — Developer Burnout & Productivity Analytics System

Designed a system that analyzes user interaction patterns to estimate cognitive fatigue and productivity drop. Processes activity signals (activity duration, idle gaps, usage patterns) and generates behavioral insights supporting adaptive intervention concepts.

Shopper Spectrum — Customer Segmentation Analytics

Analyzed retail transaction data to identify purchasing patterns and customer behavior clusters. Derived segmentation insights to support targeted marketing and decision strategies.

Tourism Experience Analytics

Explored travel dataset to identify seasonal demand trends, location preferences, and visitor behavior patterns. Generated visual insights useful for service planning and resource allocation.

EDUCATION

Bachelor of Technology - Artificial Intelligence and Data Science

SNS College of Engineering | 2023 – 2027 | CGPA: 7.50

CERTIFICATION

- **Generative AI & Future of AI Technology** — NVIDIA (2026)
- **Generative AI Fundamentals** — Databricks (2025)
- **Machine Learning Internship Certification** — Technohacks (2025)
- **GenAI Data Analytics Job Simulation** — Tata / Forage (2025)

LANGUAGES

English | Tamil | Kannada | Malayalam | German (Basics)
